March 28, 1945

To the People of Central Bucks County:

It is with a sense of pride that we present this our first annual catalogue. We have included in it as much helpful information as possible about the many products we sell and we hope you will find it sufficiently valuable to keep for reference.

Operating as we are in the midst of war, under a multitude of necessary regulations and restrictions, there are bound to be items shown in this catalogue which we may not always have in stock, or which we may not be able to sell generally because of priority restrictions. For the same reason, all prices shown are subject to change without notice. These conditions are entirely beyond our control and we ask your indulgence for them. We do assure you, however, that your business is as greatly appreciated now as it always has been, and that we are doing everything possible to render the same courteous and helpful service as in the past.

As you look through this catalogue, you will notice we rarely handle competing lines of merchandise. Our policy in this respect has been first to pick the line which represents the best value, not necessarily the cheapest price; then to learn all we can about the proper uses of the items in that line. This insures maximum satisfaction in the use of any product by the customer. Since this policy requires a program of employee training, it is obvious that the fewer products there are to learn about, the better the job that can be done on them. It is equally obvious that no one can possibly stock every brand of every thing that anyone might ask for. If your favorite brand of any item we sell is not listed here, that is the reason, and we only ask that you give our policy as stated above a chance to prove itself to you.

I want to leave one thought with you: WE ARE HERE TO SERVE. From our long business experience, we have accumulated a wealth of miscellaneous information which is yours for the asking, whether you buy anything or not. We are not bothered by small or troublesome orders, nor by requests for information or advice. Our telephone number is Doylestown 264. We are located just beyond the Reading Company freight station on Ashland Street, Doylestown. USE US!

Sincerely yours,

H. John Rosenberger

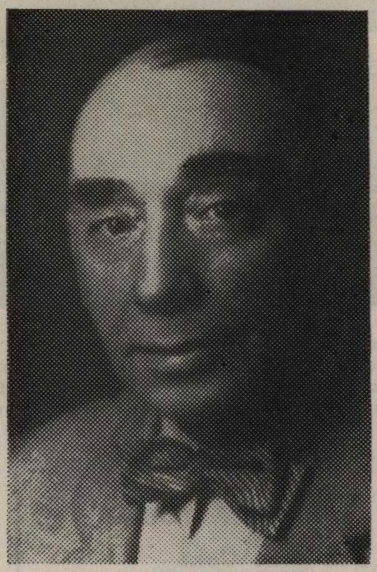
ISAAC R. ROSENBERGER
1846-1910

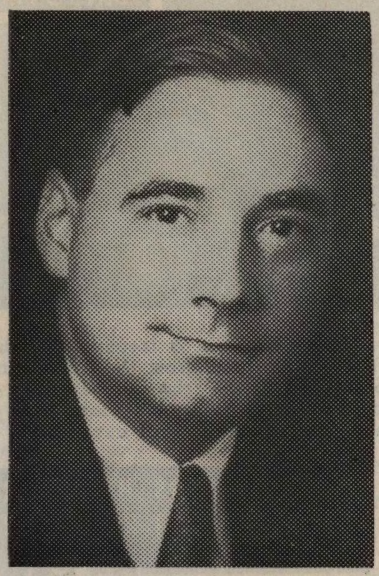
The business of H. B. Rosenberger Company was started by Isaac Ruth Rosenberger at Colmar, Montgomery County, Pennsylvania, in 1872. In 1885, a branch was opened in Doylestown, Pennsylvania, at the present site.

CONTINUOUS SERVICE FOR 73 YEARS



H. B. ROSENBERGER
1869-1937

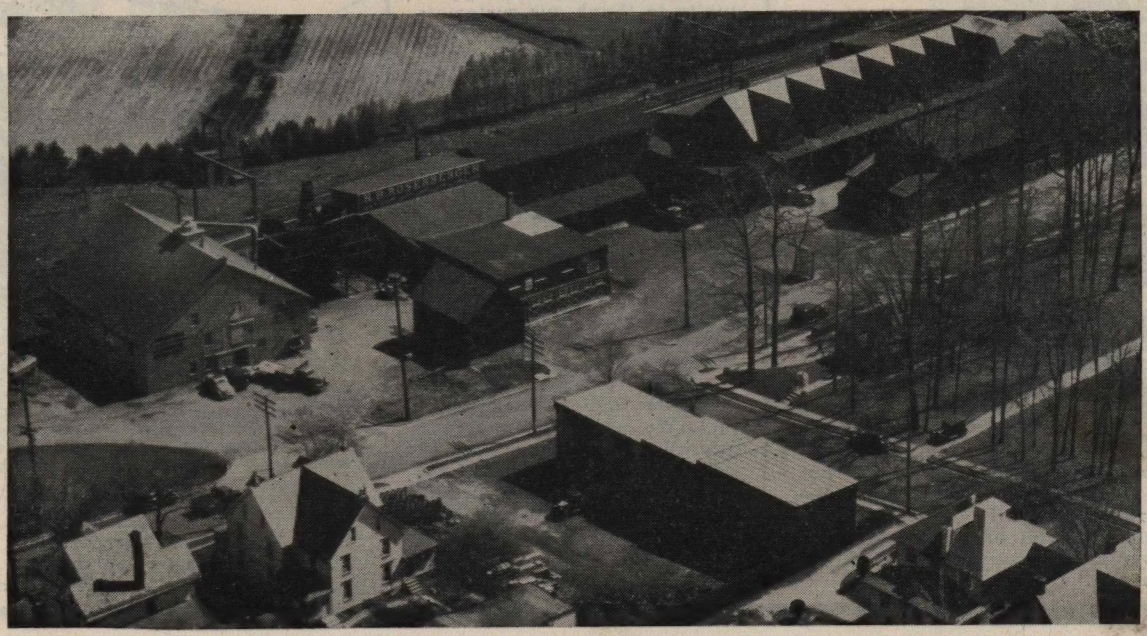
Harrington Bruner Rosenberger, oldest son of the founder, was sent to manage the Doylestown branch in 1900, purchasing it from his father in 1905. It is from him that the business takes its name. From 1905 to date, the business has grown constantly, both by the addition of new lines and by the acquisition of adjoining businesses, until now all the land at the intersection of Ashland and West Streets is owned by the company.



H. JOHN ROSENBERGER
1901-

Harrington John Rosenberger, only son of H. B. Rosenberger, entered his father's business in 1923 following graduation from the University of Pennsylvania. He has been the active head of the company since the death of his father on March 14, 1937.

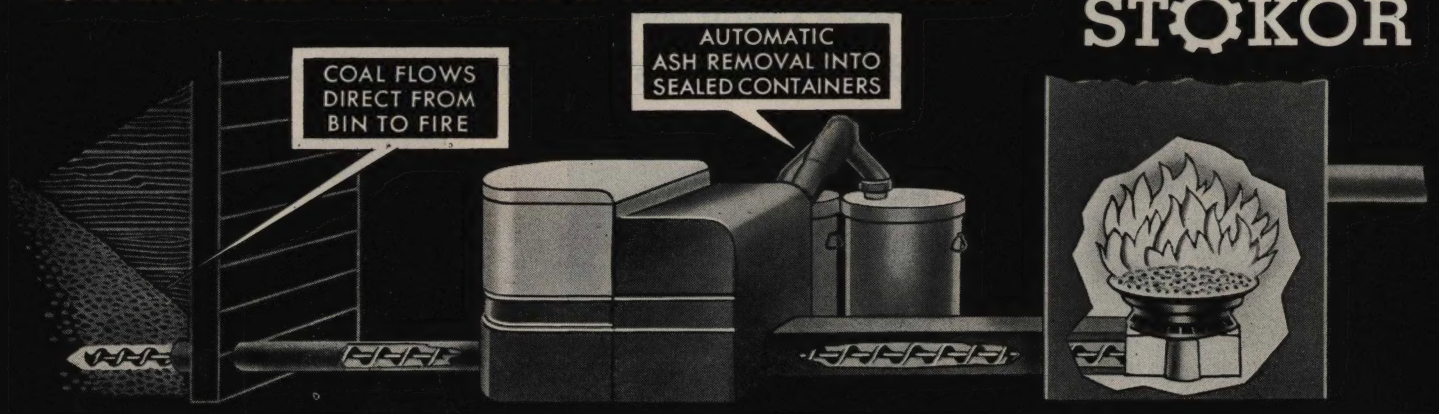
The latest expansion was the addition of the store pictured on the front cover, which was opened August 26, 1944, and which was made by renovating the old feed mill building shown on the extreme left of the picture below.



ROSENBERGERS for MOTOR STOKOR and FUELS

LOWER FUEL BILLS WITH AUTOMATIC HEAT!

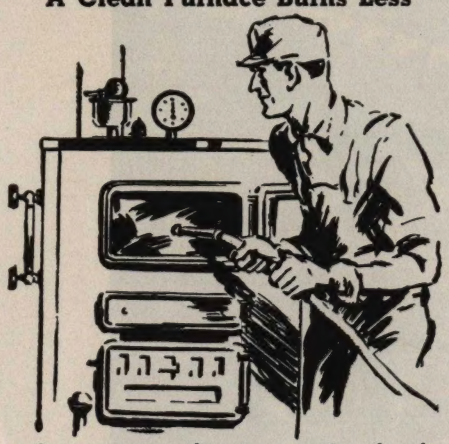
MOTOR STOKOR



Motorstokor is a mechanism which makes your present heating system, or a new one, automatic by conveying buckwheat or rice coal from the bin, burning it, and removing the ashes. It replaces only the grates in your furnace. Thermostatic controls maintain the temperature automatically, and year-round domestic hot water can be supplied. Motorstokor is in operation only when its thermostat calls for heat. During normal winter weather, this is about one-third of the time. For further information, call our office.

Hundreds of families in this vicinity are enjoying fuel savings with greater comfort by this semi-automatic method of burning coal. A number of exclusive features make it the most popular regulator. It is now available as part of the fuel conservation program.

A Clean Furnace Burns Less



Our vacuum cleaning service for furnaces is severely taxed because of the manpower shortage. If you want your furnace cleaned, call us at once and we will do our best to serve you when our man is in your vicinity.

OTHER FUELS

Bee Hive Coke
Bituminous Coal
Cannel Coal
Gulf Fuel Oil
Kindelstyx (See page 26)
Kindling Wood
Koppers Coke
Reclaimed Coke

A Word About Solid Fuel

We wish to take this opportunity to thank our customers for their understanding and cooperation during the past heating season. Because most of them willingly accepted some coke along with 'blue coal', we were never entirely out of either, and as far as we know, no one for whom we were responsible suffered for our lack of fuel. We were also able to help many people for whom we were not responsible with coke.

The outlook for next heating season is not encouraging. It will take at least a year from the end of the war to rebuild stockpiles and get back to normal. We again ask your cooperation and urge you to accept our recommendations, which we can assure you will be based on the best information available.

Yes, We Handle

Like all other coal, the demand for 'blue coal' is greater than the supply. To insure an equitable distribution among coal users, the government has established regulations as to how much we may receive and how much our customers may receive. We ask your cooperation in observing these necessary war-time restrictions.

The Ideal Fireplace Fuel

Pres-to-Logs, come in clean cartons, uniform in size, that may be stored in a closet, beside the fireplace, or any other convenient location. They are made of wood and burn like wood. The cost compares very favorably with cord wood. Try a few cartons and be convinced.

PRICE

10 to 19 Cartons, per carton	$1.00
20 to 29 Cartons, per carton	.95
30 Cartons or more, per carton	.85
At our yard, any quantity carton	.85

ROSENBERGERS for BUILDING SUPPLIES

LAPIDOLITH LIQUID

Lapidolith Liquid is a chemical treatment for concrete to prevent dusting and disintegration. When applied to a concrete surface, a vigorous chemical reaction with it takes place, depositing in the pores insoluble substances which occur in nature in such hard minerals as granite, flint and quartz. Due to the penetrating efficiency of Lapidolith, this chemical action reaches into the smallest voids and cavities.

1 Gal. ..... **$2.75** 5 Gal. .. **$2.25** per Gal.

MORTASEAL

Mortaseal is a hydrated lime especially made for high grade masonry and whitewash purposes. When used as whitewash, it will not rub off, and outlasts ordinary lime. Nothing need be added to this product to produce excellent results except water. It can be brushed or sprayed on, and needs no slacking. Price per 50 Lb. Bag **50c**

COLOR-IT

The New Process Permanent Coloring in PLASTER—STUCCO—CEMENT for Interior or Exterior Use

Color-It is the successful ingenuity of experience, time, efforts of Master Chemist, Color Experts and Research Department, to produce an economical, practical, beautiful, permanent, non-fading plaster—stucco—cement colors of uniformity, strength and brilliance. In nine luxuriant pastel tints.

Color-It is conveniently packed in 5 pound dust-proof moisture-proof packages—each package, regardless of color, will tint two-hundred pounds of plaster or cement mortar.

No. 101, 102, 103 & 105 ..... **$1.00** per Package
No. 104 & 107 ..... **1.25** per Package

ROSENBERGERS for MILLWORK

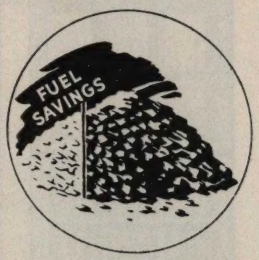
RUSCO *All Weather, Triple Service Windows*

The patented all-metal adjustable closure frame is only one of many exclusive RUSCO features. It provides a permanent, weather tight fit without caulking, and it permits fixed alignment with the existing window frame. Allows for expansion, contraction and settlement.

Positive sill drainage with exclusive seep hole construction eliminates sill decay and damage from water accumulation.

Special design glass and screen inserts are interlocked into the permanent frame to provide maximum weather-proofing and are quickly and easily interchangeable, all from the inside.

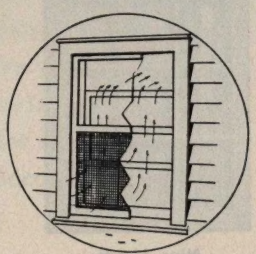


SAVES UP TO 30% OF THE FUEL BILL

Testimonial letters from RUSCO users show amazing savings in fuel. Engineers claim that a single glazed window during sub-freezing weather offers no more protection than an equivalent sheet of ice. Snugly fitted RUSCO Windows keep cold air out, warm air in. Fuel savings pay for windows within a few seasons.

EASY TO WASH

Remove glass inserts from inside and wash in same room or at nearby sink without the discomfort and danger of leaning out of the window or using a ladder.



FINGERTIP VENTILATION CONTROL

Summer or winter RUSCO Windows provide rain-proof, draft-free ventilation, permit you to leave your house with windows open, yet safe from sudden summer showers. Simply close lower sash and drop upper sash half way. In winter this same adjustment offers adequate sleeping room ventilation eliminating drafts.

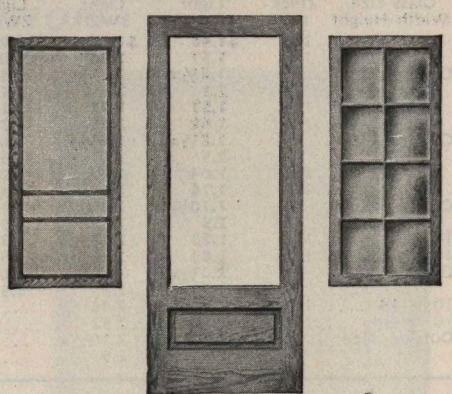
COMBINATION STORM & SCREEN DOOR

Keep flies and mosquitoes on the outside and at the same time let summer breezes circulate through your rooms from open doors, well screened. In the winter, save fuel and stop drafts. This ideal combination door serves both purposes. Its dual functioning makes it convenient as well as economical. It takes only a few minutes to change over from storm to screen door.



Made of clear wood that can be painted, varnished or stained.

ROSENBERGERS for GARAGE DOORS

3 SECONDS . . . AND IT'S OPEN

"Over-the-Top" Equipment glides one-piece doors up overhead entirely out of the way and inside the building, protected from the weather. To open your garage door all that's necessary to do is to "Release the Latch" and the door operates automatically, the opening is entirely clear in three seconds. Closing may be accomplished just as quickly and the door may be operated either from the inside or outside of the garage, the operation is the same.

NEW DOORS NOT NECESSARY

Any type of garage door may be used with "Over-the-Top" Equipment. For instance, your present doors, no matter if they are of one, two, or three sections, may easily be converted into one solid overhead operating door. On a new garage, however, a design of door to blend with and enhance the appearance of the home such as the owner or architect may desire, can of course, be used.

WHERE THE POWER COMES FROM

Two large coil springs, one on each side of the door, supply the necessary power. They have sufficient strength to assure a lifetime of continuous trouble-free door operation. Each spring is put under actual test before leaving factory.

"Over-the-Top" Door Equipment

Many New and Improved Features

Rain, cold, and snow are sealed out by steel weather-strip. Angle irons across top and bottom join the two door sections into one rigid unit . . . prevent warping. Note how latch engages on both side jambs for complete protection. Lifting power of springs is easily increased or decreased by simple adjustment.

OUTSTANDING FEATURES

1. Operates easily and silently.
2. Equipped with Automatic Openers.
3. May be applied to used or new doors.
4. Weather-tight.
5. Door prevented from slamming by patented Friction Brake.
6. Adjustable for various weights of doors.
7. Door cannot close of its own accord.
8. Quickly installed—no costly fitting.
9. When open, the door is entirely within the building.
10. Door perfectly balanced in any position.
11. Door automatically locks on both jambs.
12. Saves garage floor space.
13. Prices are within the reach of every purse.

The conventional type garage doors pictured above are made of clear vertical grain Fir.

They are 1¾ inches thick which means durability. Expert workmanship makes them the finest doors that we know of.

They are sold unglazed and without hardware.

PRICES and ESTIMATES ON REQUEST

ROSENBERGERS for WALLBOARDS

WALLBOARDS have become an important factor in the building field because of their varied uses, ease of installation and economy. Old rooms that have seen better days can be attractively renewed with these materials at low cost. If you are trying to make use of every available cubic foot of space within the walls of your home, wallboard is the answer to your problem. Paneling, moulding and other decorative treatments possible with modern wallboards will make an old house seem like new.

GYPSUM WALL BOARD

ALAMAC
Triple A Quality

is a rigid, fireproof board covered with smooth paper sized for painting. The long edges of each board are recessed to receive the re-inforced joint system shown below. The board is made 4' wide and 6', 7', 8', 9', 10' and 12' long and in two thicknesses, 3/8" and 1/2". The 3/8" board is designed for use on ceilings or above wainscoting, while the 1/2" is for sidewalls. Price per Square Foot:
3/8" . . . . . **4c** 1/2" **4½c**

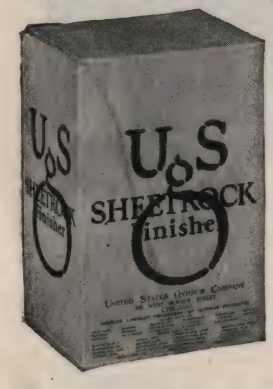
RE-INFORCED JOINT SYSTEM

for Gypsum Wallboards

The old problem of covering wallboard joints is remarkably and successfully solved with this Re-inforced Joint System, consisting of a stout chamfered and perforated tape and suitable cement. Joints reinforced with this system are as strong as the board itself and are left exceptionally smooth to take any decoration. Complete instructions accompany each package.

Tape and Cement for:
60 lineal feet of joints, per package . . **$1.35**
250 lineal feet of joints, per package . . **3.50**

WALLBOARD JOINT FILLER



Where a permanent smooth, plaster-like wall is not desired, this material does an excellent job of filling joints in wallboard. It is also used to conceal scars or nail holes. It is mixed with water and applied with a broad blade knife. Price per 5 Lb. Package . . . **50c**

UPSON BOARD

An economical fibre board of unusual strength, cream in color with an attractive, pebbled surface, available in 4' widths, 6', 7', 8', 9' and 10' lengths.

Price
3/16" Thick, per Sq. Ft. **5¾c**

Emerald—*

When available in the same sizes with a softer surface and light green in color at **4c** per Square Foot.

HARDBOARD*

A smooth surfaced, compressed fibre board with an extremely hard surface. Brown in color, it is knotless, grainless and splinterless, although made from wood, especially adaptable for sidewalls, wainscots, table tops and counters. It defies heat and cold, is moisture proof. Properly applied, it will not chip, crack or warp, and can be painted any color. It is very popular because of its strength in comparatively thin sheets.

Sizes: 4'x7', 8', 9', 10' and 12'
1/8" Thick, per Sq. Ft. **8½c**
3/16" Thick, per Sq. Ft. . . . **10½c**
1/4" Panel Board, per Sq. Ft. **8½c**
1/8" Tempered, per Sq. Ft. . . **10½c**
3/16" Tempered, per Sq. Ft. **12½c**
1/4" Tempered, per Sq. Ft. . **16½c**

TILE BOARD

Tileboard is ideal for baths, kitchens, hospitals, food stores—any place that requires a beautiful, easily cleaned, smooth surface for walls and ceilings. Available either scored like tile, or unscored. Applied with special mouldings, nails and mastic. Price per Square Foot from . . . . . **25c** to **40c**

RUBEROID STONEWALL
Asbestos Board

Made of imperishable asbestos-cement, Stonewall is permanent, fireproof and termite-proof, cannot rot or corrode. It comes in large 4' x 8' easy-to-handle sheets that do not even have to be sawed. Just score and break them to size. No trouble to apply, no trouble after it is applied. Stonewall is the efficient answer to farm repair problems. Once on the building, it is off your mind forever!

PRICE
3/16" thick . . . . . **8½c** Sq. Ft.
1/4" thick . . . . . **10½c** Sq. Ft.

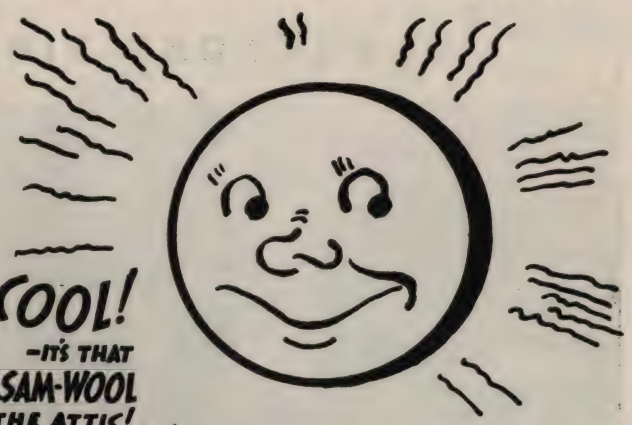
OTHER WALLBOARDS

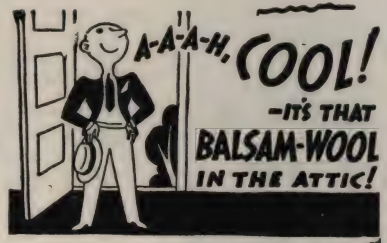
Gypsum Sheathing
2' x 8', 1/2" Thick, T&G per Sq. Ft. **3½c**

Fir Plywood—* Insulation Board—See Page 13

ROSENBERGERS for INSULATION

Be Comfortable This Summer and Next Winter, Too With Insulation





ELMCO Gold Leaf

ROCK WOOL

fireproof, mineral insulation

ELMCO ROCKWOOL . . . is a fluffy fireproof insulation made from minerals. For proper installation, it should have a vapor proof paper barrier placed between the warm side of the house and the Insulation. Elmco Rockwool is easy to install.

ELMCO ROCKWOOL INSULATION BATTS . . . have moisture-proof paper backs on one side. They are usually installed between open rafters, studs and joists. Can be cut with a knife to fit any space.

Size, 15" x 24" or 48", Wall Thick, Per Square foot ..... **$.06½**

Size, 15" x 24" or 48", 2" Thick, Per Square foot ..... **.05**

ELMCO GRANULATED ROCKWOOL . . . a low cost fireproof granlated mineral wool insulation that pours freely from the bag. Merely pour and level it between joists and between outside walls. One 40 lb. bag of Elmco Rockwool will cover at least 24 sq. ft. 3" deep.

Per 40 lb. bag **$1.35**

ELMCO LOOSE ROCKWOOL

Per 40 lb. bag **$1.15**

Enough for 20 sq. ft. Wall Thick

Do you know how simple it is to insulate your house against summer's sweltering heat? In a few hours, any carpenter can tuck BALSAM-WOOL Blanket Insulation into your attic floor or roof. That's all there is to it—but once the job is done, you'll always have a cooler house in summer and spend far less for fuel in winter.

BALSAM-WOOL costs amazingly little. It is windproof, waterproof, verminproof and fire resistant. Satisfaction guaranteed.

BALSAM WOOL . . . comes in handy, easy to install rolls 16" and 24" wide. Sizes are Standard thick and Double thick. The rolls have selvage edges so that long spaces may be installed in one continuous piece. The Balsam Wool is thus "sealed" between moisture-proof paper. It may be nailed, stapled or tucked into place.

STANDARD . . . 16" wide is packed 100 sq. ft. per roll—two rolls per bundle. Price per sq. ft. ..... **$.05¼**

STANDARD . . . 24" wide is packed 200 sq. ft. per roll—one roll per bundle. Price per sq. ft. ..... **$.05¼**

DOUBLE THICK . . . 16" or 24" wide, per sq. ft. ..... **$.07½**

BALSAM WOOL

LOCKAIRE
PAINTCOTE

A highly efficient rigid insulation board made from the tough fibers of licorice root. It is treated for resistance to vermin. One side is primed with a light colored paint, ready to receive a final decoration of paint or paper.

Sizes: 4'x8'—10'—12', ½" thick.

Price: **5¼c** per square foot.

LOCKAIRE
ASPHALIC BOARD

Same as above, except the fibers have been treated with asphalt. It is water resistant and weatherproof. Suitable for range shelters, sheathing, etc.

Sizes: 4'x8' and 6'x12', ½" thick.

Price: **6¼c** per square foot.

LOCKAIRE LATH

An insulating plaster base.

Size: 18"x48", ½" thick.

Price: **5¼c** per square foot.

ZONOLITE

GRANULAR FILL INSULATION

Between sidewalls and between joists, Zonolite Granular Fill pours as easily as pouring popcorn from a sack! Any farmer, poultryman or home owner can do it easily—which is a mighty important sales point, the help problem being what it is.

Covering capacity per 24 pound bag—26 sq. ft.—2" thick. 17 sq. ft. 3" thick. 13 sq. ft. 4" thick.

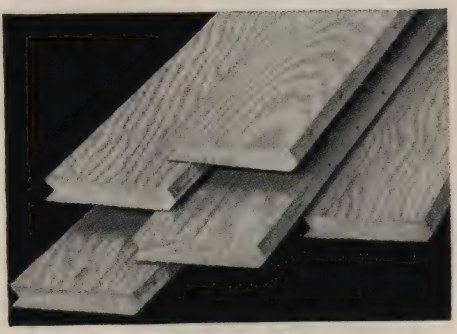
Per 24 lb. bag **$1.25**

NO GOV'T LIMITATION . . . or priority required for Wool Insulation or granule surfaced, rigid insulation sidings because they insulate homes and save fuel.

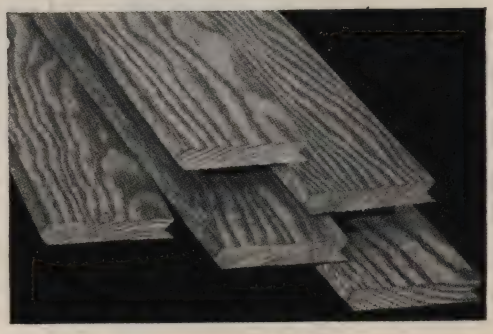
ESTIMATES . . . gladly furnished for your complete job applied or for materials only. Phone us today.

ROSENBERGERS for MOULDING and FLOORING

FACTORY FINISHED FLOORING



LIGHT OAK



DARK OAK

A NEW FLOOR IN A DAY. Move the furniture out in the morning and back in the afternoon. That's how easy it is to modernize with **FACTORY FINISHED** flooring.

No sanding, finishing, mess or smell. You don't even have to take down the pictures. It is ready for instant use and is laid right over old floors.

FACTORY FINISHED, the finish that is applied at the factory, penetrates the pores of the wood—resists marring and scratching.

A factory finished floor will cost you less than a good rug. It is easy to keep clean and beautiful. It is available in OAK, and other woods.

We will be pleased to show you samples and give all information that you desire.

ROSENBERGERS for ELECTRIC FENCE

CONTROLLERS

MODEL NO. 480-A GRAND CHAMPION

For Use with 110-120 Volt Alternating Current

Approved for Safety by the Underwriters' Laboratories, Inc.

A hi-line controller that puts alternating current (the most effective type of current for electric fencing) on the fence. Twice as much "shock" as many makes. Economical to operate (uses less than 2 kilowatt hours per month); no radio tubes to burn out. Equipped with these control features; Short Signal Light, Soil Selection Switch, Safety Circuit-Breaker, On-Off Switch, Double Fuse Plugs, Short Meter, Short Meter Switch, Safety Barrier, Specially-Designed Transformer, Moto-Chopper, Radio Interference Eliminator, Ground Clamp, Lightning Arrester, Instruction Books. PRICE **$42.50**

VICTORY MODEL NO. 33-V—for 6 Volt D. C.

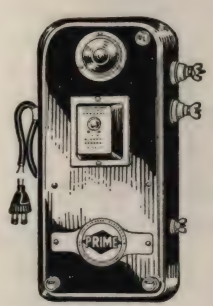
(Same as Standard Model No. 333, except that On-Off Switch and Battery Compartment have been omitted.)

33-V 6 Volt Price $15.50

You get all these features

1. **Short Signal Light**—flashes on and off when controller is operating properly—can be seen from a distance.
2. **Moto-Chopper**—single impulse type that is low in battery drain, high in effectiveness.
3. **Soil Selection**—two fence lead-out terminals, one for normal conditions, one for dry conditions.
4. **Transformer**—specially designed for battery electric fencing—drains very little from battery but sends an effective "shock" onto fence line.
5. **Lightning Arrester**—built in, to protect controller.

VICTORY MODEL NO. 48-V for 110-120 Volt 60-cycle A. C.



Approved for Safety by the Underwriters' Laboratories, Inc.

With all these tested features

1. **Short Signal Light**—flashes on and off.
2. **Underwriters' Label**—assurance of safety and dependability.
3. **Soil Selection**—two fence lead-out terminals for normal and dry soil conditions.
4. **Safety Circuit Breaker**—prevents flow of dangerous steady current to fence.
5. **Double Fuse**—one on each leg of incoming circuit. Protects controllers and adds to safety.
6. **Safety Barrier**—grounded metallic barrier, separating hi-line from fence circuit.
7. **Transformer**—retains true characteristics of alternating current.
8. **Moto-Chopper**—precision-built timing mechanism, regulates flow of current to fence. Dust-tight compartment—ball bearings sealed in oil.
9. **Radio Interference Eliminator.**

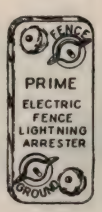
Heavy porcelain insulator to stand extra strain at end or corner posts.

ACCESSORIES

LIGHTNING ARRESTERS



P-244 Lightning Arrester. Wt. 1 lb. . . Each **30c**
(Designed for use with all Prime Models except 700-710-720.)
P-212 Lightning Arrester. Wt. 1 lb. . . Each **45c**
(Designed for use with models 700-710-720 only.)
Note—Models 200-330-333-33V have built in arresters. No other arresters are necessary unless additional protection is desired outside building or on fence line.

HOW TO MAKE A GATE FOR ELECTRIC FENCE

	Each	Wt.
P-500 Gate Handle—Solid Brass Conductor ...	**30c**	8 oz.
P-501 Gate Spring—Plated Spring Steel	**8c**	6 oz.

NOW YOU CAN SEE HOW MUCH SHOCK IS ON YOUR ELECTRIC FENCE

TEST-RITE

. . . the graduated tester that gives you a true picture of the shock on your fence line.

As a thermometer enables you to determine accurately the degree of heat or cold, so will the Prime Test-Rite enable you to determine accurately the intensity of the shock on your electric fence wire. You should know that the maximum current output of the controller is being retained on the fence wire and is not being dissipated through current leakage resulting from faulty installation or from shorts that may develop from time to time.

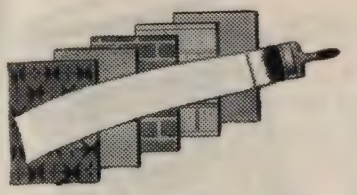
Stirring is injurious to most paints. Every can paint sold by us is properly conditioned in our can shaking machine. A Rosenberger Free Service.

ROSENBERGERS RECOMMEND

FENTONE *Washable* WALL FINISH

One Coat Covers Most Surfaces



Facility Brushes Beautifully thereby cutting the energy required for application to a minimum. Applied with a wide brush and long effortless strokes, it flows together without laps or brush marks. When finished, brushes may be cleaned easily by washing with soap and water. May also be applied with Modac Applicator.

Comfort FENTONE dries in one hour and does not have any objectionable odor. A room painted in the morning may be lived in by evening without any inconvenience.

Beauty Modern pastel shades which will bring flower freshness to even the most drab rooms. FENTONE gives that soft velvet-like matte finish insisted upon by the better interior decorators, creating the much desired high light reflectivity without a trace of glare.

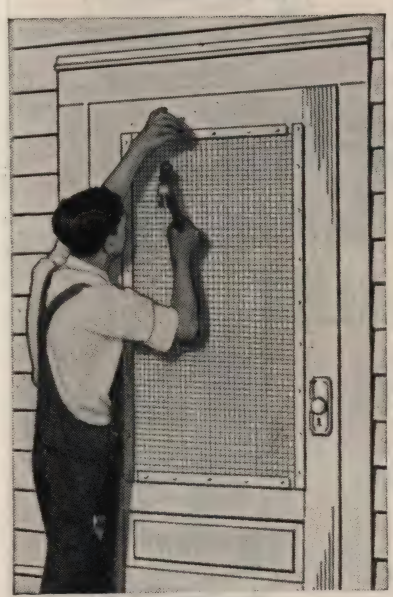
Durability When FENTONE is thoroughly dry it forms a hard elastic film which may be washed with soap and water when necessary.
Painted over wallpaper FENTONE will retain its unblemished appearance indefinitely and will not allow any type of color to bleed through.

Economy Only water is needed as a thinning agent. One gallon of FENTONE when mixed with water makes 1½ gallons of paint, which will cover practically any surface with one coat, wallpaper included. FENTONE does not require any sizing or priming coat.

1 GALLON CAN	**$2.45**
1 QUART CAN	**.75**
ADD 50% WATER	
MODAC APPLICATOR	**.89**

Admits 60% ULTRA VIOLET RAYS

DOUBLY REINFORCED



R-V-LITE STORM DOOR

R-V-LITE is transparent, weather-proof and shatter-proof. R-V-LITE storm windows cut fuel bills. R-V-LITE keeps heat in, cold out and admits sun's vital ultra violet rays, freely, thus promoting poultry health and greater egg yield. No wonder R-V-LITE is the nation's favorite window material.

R-V-LITE IS EASY TO CLEAN

R-V-LITE IS EASY TO INSTALL

R-V-LITE PROVIDES

BETTER HEAT INSULATION

R-V-LITE can be used wherever glass is used. It is BETTER than glass for many purposes. R-V-LITE is flexible, light in weight and easy to handle. You can easily cut it with a pair of scissors, yet it is tough and durable—gives lasting service.

VITA-VAR INTERIOR VELVET GLOSS

For Kitchens, Bathrooms, Children's Rooms

The wall finish that keeps its gloss and color under repeated washings with soap and water! For walls and woodwork in kitchens, bathrooms, nurseries—and on any interior surface where a semi-gloss finish is desired and frequent cleansing is needed! Smart modern colors.

$3.15 per gal.

ROSENBERGERS for HOUSEHOLD HELPS

Mortite
YEAR AROUND PLUGGER-UPPER

A pliable Plastic that plugs holes in and around screens, casements, drainboards, sinks, bathtubs, etc. Stops rattles.

In winter weatherstrips windows.

MANY USES IN THE HOME

Keeps out dust and dirt, mosquitoes, flies, ants and other insects.

Easy to apply. Unrolls like ribbon. Adheres to any clean, dry surface. Just press into place and it stays put. Does not shrink, crack or chip.

About 80 feet to box, enough for 5 windows.... **$1.25**

A PLASTIC REPAIR MATERIAL IN POWDER FORM

Like all of Durham's Products, Durham's Rock-Hard Water Putty is made carefully and accurately from the finest materials.

It meets a thousand repair needs. Comes in dry powder form. Keeps indefinitely. Just put a little in a pan, add water, mix and use. Hardens in about thirty minutes.

You can saw it—chisel it—polish it—color it—mold it.

Sticks and stays put and will not shrink. Fills cracks—crevices—joints—knot and nail holes. Permanently adheres to wood—cement—plaster—tiles—composition—stone.

Use it to repair furniture—set loose handles—set tiles—fill cracks in boats—mold novelties—hundreds of other uses. Will withstand weather indefinitely if kept painted.

You can color it easily by just adding any dry earth color such as Burnt Umber, Burnt Sienna, etc.

INDISPENSABLE TO

WOODWORKERS — ELECTRICIANS — CARPENTERS — HOUSEWIVES — PATTERN MAKERS — DECORATORS — FLOOR FINISHERS — BOAT LIVERIES — PAINTERS — MANUAL TRAINING SCHOOLS — PLUMBERS.

1 Lb. Can—**$.30**; 4 Lb. Can—**$1.00**; 25 Lb. Drum—**$5.75.**

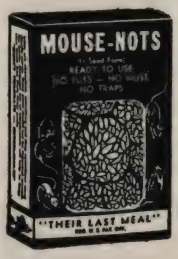
ROSENBERGERS for PEST CONTROLS

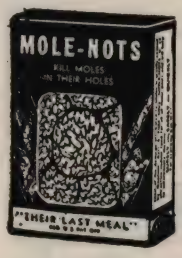
RAT-NOTS

A non-poisonous prepared bait containing genuine "FORTIFIED" RED SQUILL. A safe, sanitary way to exterminate rats. Rats are attracted to RAT-NOTS because of their tempting odor. "THEIR LAST MEAL." **25c.**



MOUSE-NOTS

A meaty, easily hulled, treated seed bait which appeals to the finicky taste of mice. Simply spread in places where mice frequent. "THEIR LAST MEAL." **25c.**



MOLE-NOTS

Life-saver for lawns, flower and seed beds. Sure death to bulb-eating, root-destroying moles. MOLE-NOTS safeguard bulbs when placed in ground at time of planting. "THEIR LAST MEAL." **35c.**

RAT-NOT-PASTE

Recommended for big, well-fed elusive rats which dodge cats and traps, and are finicky in their eating habits due to easy access to tasty-garbage, and feed and food warehouses. Ideal, too, for control of chipmunks, squirrels, prairie dogs. "THEIR LAST MEAL." Packaged in handy, convenient tubes. **35c.**

ANT-X JELLY BAIT

A most effective bait for destroying all species of ants—SIMPLE TO USE—Not a repellant but a "THALLIUM SULPHATE" food bait that ants eat and carry back to the nest. Destroys entire colony. "THEIR LAST MEAL." **35c.**

ANT-X ANT TRAPS

A safe, sanitary method for controlling ants in house and garden. Attracts and destroys both sweet and grease-eating ants. Cannot be opened by children or spilled by pets. ANT-X TRAPS may be placed inside ice-boxes or other food containers without contaminating foods. "THEIR LAST MEAL." **25c** retail size.

DOG-CHECK

An effective proven curb to canine habits, needed by all whose neighbor's dogs "visit" and wither flowers, shrubs, hedges and saplings. One spraying usually lasts from two to three weeks—unaffected by light rains. Small size contains 6 DOG-CHECK APPLICATORS. (Patent Pending); large size contains 12 APPLICATORS. **60c** and **$1.00** retail sizes.

ROACH-NOTS

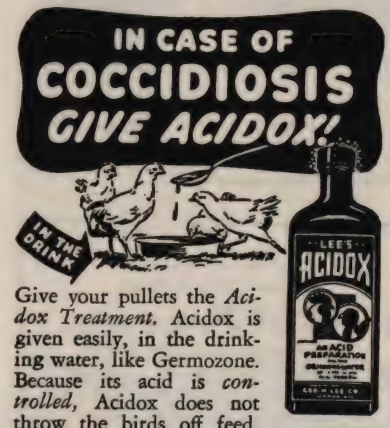
A prepared powdered bait, quick and effective. ROACH-NOTS "Lays them on their backs." "THEIR LAST MEAL." **25c.**

KILMICE (MICE SEED)

A treated, tasty, impregnated seed bait which quickly destroys mice in house and garden. Easy to use—clean, sanitary, no mixing—no traps needed. "THEIR LAST MEAL." **25c.**

SKEET-CHECK

An ointment repellent, packaged in convenient handy tubes, easy to apply and pleasant to use. Unexcelled for repelling mosquitoes, gnats, black flies, deer flies and other annoying insect pests. SKEET-CHECK is also an excellent soothing salve that will help to allay swelling when once bitten. FOR OUTDOOR COMFORT DOUBLE CHECK WITH "SKEET-CHECK." **35c** retail size.



Give your pullets the *Acidox Treatment.* Acidox is given easily, in the drinking water, like Germozone. Because its acid is *controlled,* Acidox does not throw the birds off feed. Greatest loss from Coccidiosis is in the set back to the birds, and delayed growth and development. They need a medicine that will help them resist the disease and reduce death losses without upsetting them. Give them Acidox. A 12-oz. bottle, to treat 300 chicks for 2 weeks, **$1.00.**

Germozone does 3 Vital Jobs
1ST, ACTS IN DRINK against germs and bacteria with which it comes in contact there. **2ND, ACTS IN CROP!** Ordinary disinfectants may purify drink, but many germs are also picked up from litter-droppings. Germozone acts in crop, too. **3RD. ACTS IN INTESTINES.** Germozone is not only an astringent in intestines, it also acts against harmful bacteria there. Valuable for many simple crop, digestive, bowel disorders.

PURINA CHOWS

For Top Results

CALF STARTENA—A complete feed for raising baby calves, using milk only first month. Economical, self fed, requiring less labor to raise good calves.

COW CHOW—Complete dairy feeds to meet dairymen's needs. Built to keep cows in condition for capacity production and long milking life.

DRY & FRESHENING CHOW—To help rebuild the dry cow and help get her ready for easy calving and heavy production later. Splendid for fitting show cattle.

CHICK STARTENA—The country's largest selling baby chick starting feed. Built to grow vigorous chicks. Feed only two pounds of Startena per chick.

CHICK GROWENA—A complete feed for growing birds in mash and checker form. Grows vigorous chicks. Feed only two pounds of Startena per chick.

LAYENA—Complete, all mash laying feed in mash and checker form. Produces the famous Layena eggs. Makes lots of eggs of high quality for market.

TURKEY STARTENA—A complete starting feed for turkey poults in mash and checker form. Built to grow big, vigorous poults.

TURKEY GROWENA—A complete growing feed in mash and checker form to carry the birds up to the 20th week. Grows them quickly.

TURKEY LAYENA—A complete feed in mash and checker form, scientifically built for producing a large quantity of highly hatchable turkey eggs.

PURINA RABBIT CHOW—For feeding domestic rabbits for meat or pelt production. Comes in two forms, complete feed or supplement to be fed with alfalfa hay.

PURINA DOG CHOW—The complete dog food in two forms—handy checker form, easy to feed, economical. Comes in two sizes—large checkers and small checkers, also in Kibbled meal form to mix with broths and gravies, etc., where dogs prefer their food that way.

TRY OUR APPROVED CUSTOM MIXING

PURINA CONCENTRATES *PLUS* GRAIN . . . MIXED TO OUR OWN FORMULA

★For Livestock ★For Poultry

This is a view of our modern, clean grinding and mixing room where your home-grown grains are ground and mixed by the newest and most efficient equipment. Two large doors (through one of which this picture was taken) open into this room from a covered, truck-level platform outside, enabling us to serve you with maximum speed and convenience.

Our mixing accuracy is checked periodically by laboratory analysis for protein content, at which times a small sample is taken from the first, middle and last bags of a mix. On the last test, the first sample showed 18.46%, the second 18.54% and the third 18.40%. We can therefore assure you of proper mixing.

PROPER MIXING

HELPS GET BEST RESULTS FROM YOUR GRAIN

Balanced grain is worth more because it will produce more meat, milk and eggs. For quality grinding service, result-getting formulas and Purina Supplements, see us.

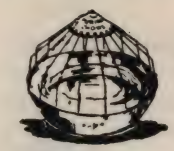
Quality FARM SUPPLIES

Many items shown here are limited in quantity—
Get your order in early.



Purina Flock
FOUNTAIN
Seamless, easy to clean, removable guard, all metal, holds 3 gallons.
Each . . . **$1.25**

Purina Egg
BASKET
Quick-cools 12 to 15 dozen. No sharp points to crack eggs. ¾" legs.
Each . . . **$ .85**

Purina Water
WARMER
Thermostatic control, 155 watt, 100 volt, AC. For pans and founts.
Each . . . **$3.84**

"Feed Right"
MEASURE
Helps fit feed to milk production. Holds 1 gal. Finger grip handle.
Each . . . **$ .40**

POULTRY FEEDER
Holds ten days' feed for 20 hens. Suspension type. Space and time saver.
Each . . . **$1.50**

Purina
WATER FLOAT
Automatic valve operates on any pressure. Saves labor. Birds are never without plenty of water.
Each . . . **$1.25**

PURINA EGG SCALE
Accurate balance type for speedy grading. Easy-to-read dial shows egg & dozen weight.
Complete **$1.35**

CHEK-R-CHIX
From high producing flocks, blood tested, fed for hatched-in vigor.
Not available this year.

Free **CALF TAPE**

REGISTERS WEIGHT
at a glance
Slip tape around heart girth. Read approximate weight in pounds. Free to new Calf Startena customers.
Get Yours *Today!*

Growing
FEEDER
All metal, adjustable legs, feed saver lip on side, accommodates 35 birds, easy filled.
With Hinged Grill $1.55
With 4-Blade Reel 1.40

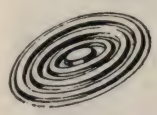
MILK SCALE
Easy-to-read dial, weighs to 60 lbs., helps stretch feed.
Each . . **$5.00**

Purina Rabbit FEEDER
All metal, attach to side of hutch, equipped with feed-saver step.
Each . . . **$ .72**

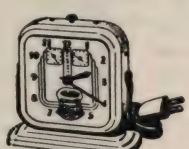
Purina Chick FEEDER
Handles day-old to four-week chicks. 24" long. Easy to clean. All metal. Helps save feed.
Each . . **$ .25**

Purina Coal BROODER
Operates 24 hours on 2 fillings. Use hard or soft coal. Thermostat control. Economical.
Complete **$26.70**

Purina Gas BROODER
For bottled, artificial or natural gas. 72 in. canopy. Approved by Purina Research Farm. Easy to operate.
Complete **$32.50**

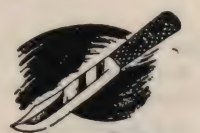


Purina
Thermostat WAFER
Fits more than 60 types of oil, electric, coal brooders. Easy to install.
Each . . **$ .35**



Purina
CLOCK and LIGHT SWITCH
Turns on lights in poultry house automatically. Reliable make.
Not available.

Purina
OYSTER SHELL
99% pure calcium carbonate. Washed and kiln-dried. Minimum of fines.
80 lbs. . . **$1.20**



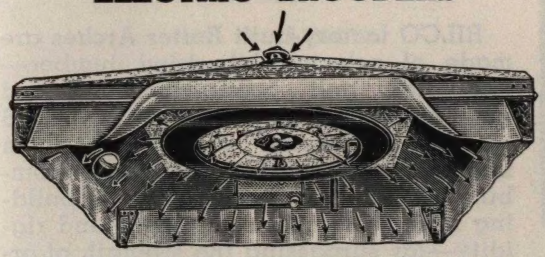
Purina
BUTCHER KNIFE
7" blade, tempered steel. Long-lasting edge. Attractive design.
Each . . . **$ .70**

Purina
HYBRID SEED CORN
Bred to produce deep rows of big kernels on small cob. Field-tested.
Not available this year.

Purina
FLOWER SEED
Fully tested for germination. All popular varieties. Generous amount in each packet.
Each . . . **$ .10**

ROSENBERGERS for Poultry Supplies and Lenape Feeds

ELECTRIC BROODERS



This is the Brower 60V Watt Saver Electric Brooder. It has a full capacity of 500 day-old chicks, maintains an even temperature throughout and ventilates without heat loss. Humidity is controlled, reducing the problem of damp litter. Operation is economical, averaging about one cent per chick. Price: **$36.00.** Others in stock as low as **$1.75.**

OIL BROODERS

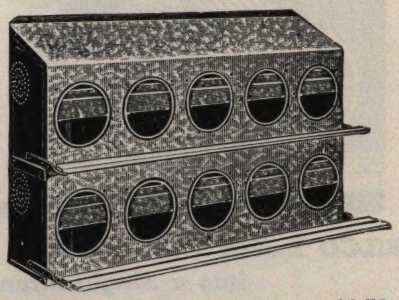
The brooder illustrated is the Buckeye No. 452A. It will take care of a house up to 10' x 10' and operates with the well-known Buckeye efficiency and freedom from trouble. Price: **$25.00.** Others in stock as low as **$15.00.**

FOUNTAINS

W-23—3 Gal. Double Wall **$1.95**
K-5—5 Gal. Double Wall . . **3.75**
059—5 Gal. Double Wall . **3.15**
C5—5 Gal. Single Wall . . **2.45**
Also many others.

No. 401—1 Gal. Glass with Plastic Base . . . . . **$.65**
No. B-132—1 Gal. Glass with Metal Base . . . . . **.65**
Also 3 and 5 Gallon sizes.

NESTS



Presdwood Nests as shown . . . **$9.75**

Chick-Bed is a natural fireproof mineral product, chalk white, odorless, tasteless, light in weight and harmless to man, animal or bird. Being over 90% air, its millions of air cells give it its most important advantage: tremendous absorbability. It soaks up poultry droppings or spilled water quick as a wink. Then because of the air cells, and unlike ordinary litter, it gives off this moisture into the air where it is taken away by ventilation. Results: floors stay dry and air humidity stays healthful. One bag of from 90 to 100 pounds covers 45 to 50 square feet of floor space. In brooder houses, it lasts from 8 to 10 weeks and in laying houses, from 3 to 5 months. When finally removed, it makes an excellent fertilizer.
Price: . . . . . **$2.60** per Bag

A WORD ABOUT OUR LENAPE FEEDS

Twenty years ago, when we first made Lenape Mash Feed, it was an outstanding success, and became known as one of the lowest cost egg producers available to poultrymen.

The formula has been constantly improved, taking advantage of every good thing that modern scientific research has discovered in animal nutrition. The line has been expanded from a single feed to a starting mash, broiler mash, growing mash, pig feed and scratch feed, as well as a laying mash. Further additions will be made as formulas for them get beyond the experimental stage.

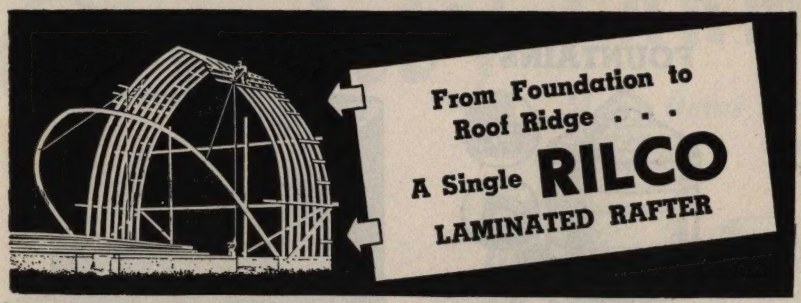
What makes Lenape Feeds so good? One answer is furnished by the list of ingredients and various required guarantees as to Protein, Fat, Fibre and Nitrogen Free Extract (N.F.E.). But you know that this leaves the major part of the story untold. The power factors in feeds—the factors without which no ration can be strong

in terms of results—are Amino Acids (the components of Proteins), Vitamins and Minerals.

As a rule, these factors represent less than 20% of the ration. You can see, therefore, why the right quality and correct proportions of them are vital to successful results. In Lenape Feeds, these factors are introduced in their best nutritional forms and are combined in accordance with the results of exhaustive experimentation. This work is not done at the feeders' expense, but by one of the foremost biological laboratories in the country, with whom we are working closely.

You can buy Lenape Feeds with our full assurance that each is designed with only one thought in mind—to do the best and most economical job for which it was intended. For this reason, we welcome comparative tests against any feed you are now using, or may be thinking of using. We honestly believe you owe it to yourself to try Lenape.

ROSENBERGERS for Farm Buildings and Equipment



RILCO Rafters Combine Wall and Roof Framing into a Single Strong Unit

RILCO Rafter Arches are a continuous unit from foundation to roof ridge. Thus wind stresses and roof loads are transmitted along the arch directly to the foundation. The weakest point in an ordinary frame building is the joint between side wall and roof framing. RILCO eliminates this weak point because it eliminates this joint.

A STRONGER, SINGLE UNIT RAFTER ARCH

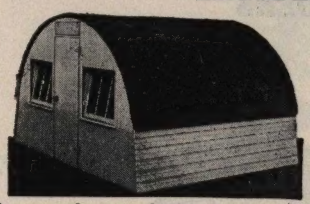
RILCO factory-built Rafter Arches are made of selected kiln-dried lumber—laminated and permanently bonded with modern structural glues. RILCO'S correct engineered design, precision manufacture, and quality materials combine to produce Rafter Arches and building frames of superior strength and rigidity—far surpassing the strength of ordinary frame construction.

RILCO further adds to the strength of the structure by two special methods of joining. For Anchoring the base of the Rafter Arch to sill and foundation, RILCO makes angle iron connectors of great strength. For Joining Rafter Arches at roof peak or ridge, RILCO provides ridge-irons of special design.

LAYING HOUSE

This is the most popular type of RILCO laying house. Straight side wall in front provides most convenient lighting, and RILCO Rafter Arches of this type assure extra strength and a minimum of waste space in the house.

BROODER HOUSE



RILCO brooder house Arches are available in standard sets of four arches for a 12' x 10' house as illustrated. The RILCO Arch shape house assures maximum floor space with a minimum of waste space overhead to be heated. RILCO Arches make a brooder house that is light in weight, yet rigid, strong and sturdy and easily moved to clean ground with team or tractor.
